Have You Enjoyed The Polluted Diwali ?

By Pranav Padmane

Have You Enjoyed Polluted Diwali ?

India the country of love, culture and respect. Indian people celebrate all the festival. There is no any other country having such amount of Festivals. But while celebrating this and enjoying our lives, is we are missing something which is important?

Diwali ,the biggest festival in India. Every member in family is gets excited about new dress, lots of *farals* and most important THE FIRECRACKER.

Air pollution and Noise pollution During diwali period is approxiemately **five** times more than usual days. The current population of India is 1.252(2013). So we can imagine the amount of air as well as noise pollution is occur in India.

When we use firecracker the toxic gases are envolved in the atmosphere like carbon dioxide, carbon monoxide, sulphur, phosphorus causes the severe disease like asthama, heart attack, different disease of lungs, difficulty in breathing, temporary or permanent damfness and such many other disease.

Fire cracker is the meaning less thing to spent money, it is enjoyable for the moment so why should destroy our mother nature for just few secong of enjoy . Take a pause, think on it. Everyone feels that our child should get good and healthy atmosphere, so its your responsibility to help to maintain the atmosphere good and healthy. But this is all about us, what about that animals and birds which dies because of such a heavy noise pollution.

Have You Enjoyed Polluted Diwali ?

We wishes each other "happy diwali" is that is your "**happy diwali**"? Civilbuzz is trying to attract the attention of youth to this important issue, because they are the back bone of the country. If you celebrate this diwali as a polluted one, don't worry, there are many in future, So **Lets Begin** to celebrate the Eco-friendly diwali.

Following is the table showing the bad effects of the harmful material present in the firecracker.

Chemical	Impact
Copper	Irritation of respiratory track
Cadmium	Anemia and damage to kidney
Lead	Affect the nervous system
Magnesium	Its dust and fumes cause metal fume fever
Sodium	Reacts violently with moisture and can attack the skin
Zinc	Leads to vomiting
Nitrate	Could lead to mental impairment
Nitrite	Could lead to coma

Have You Enjoyed Polluted Diwali ?

DID YOU KNOW?

this diwali the air you inhale in your body is so polluted that properly this can make you unfit as after having 10 smoke in a one day

Have You Enjoyed Polluted Diwali ?

DID YOU KNOW?

The person who make the firecrackers is die probably **three** times earlier than average person

Have You Enjoyed Polluted Diwali ?
